LYCÉE FRANÇAIS  
DU CAIRE

# Problem

The Lycée Français du Caire (LFC), known for its multicultural environment, the school welcomes students from various nationalities, promoting a bilingual education in French and Arabic, with English also being taught as a foreign language. The institution prides itself on its strong academic performance and its commitment to nurturing global citizens who are well-prepared for higher education and future careers. LFC required an innovative faculty boardroom using top technology for simple wireless sharing.

## Improved Technology in the Boardroom

LFC was looking to elevate the technology available in the faculty boardroom.

## Simple Technology for Collaboration

LFC was seeking a solution that enabled seamless wireless sharing and fostered easy collaboration between teachers and students for a more dynamic and engaging learning environment.

# Solution

LFC required an innovative faculty boardroom using top technology for simple wireless sharing. Interactivo Digital Platforms—an AV/IT integration firm serving Greece, Southeast Europe, Egypt, and North Africa—was up to the task, having standardized on Mersive’s Solstice wireless collaboration platform in all of its K12 education projects and beyond.

## Simple, Effective Technology

Mersive’s Solstice is an intuitive and powerful platform that allows multiple students and teachers to share content simultaneously, making collaboration effortless and engaging.

## Meeting Efficiency

Mersive’s Solstice elevates a meeting room to allow for more efficient collaboration amongst several individuals.

## Global Compatibility

Platform-agnostic wireless sharing:  
Compatible with any device  
(computers, phones, tablets).

# Result

Mersive's Solstice allows LFC faculty to wirelessly share content for true, easy collaboration. Interactive standardizes on Mersive Solstice wireless screen sharing to create more productive and insightful faculty meetings. The Samsung displays inset into the unique boardroom table are fed by Mersive's Solstice Pods, allowing users to share effortlessly via the intuitive user interface.

## Streamlined Collaboration

With Mersive's Solstice Pods in place, LFC faculty and students unlocked a new level of visual collaboration, making it easier than ever to connect, share, and engage.

## Streamlined Meetings

The faculty boardroom can now host efficient meetings, with several display screens and the ability to share multiple items wirelessly.

“

Mersive Solstice is highly regarded for its wireless collaboration and presentation capabilities, making it a popular choice in K12 educational settings all over the world[.] It allows multiple users to connect and share content wirelessly from their devices to a shared display, eliminating the need for cables and adapters. This system supports simultaneous content sharing from multiple users, fostering real-time collaboration.”
