

Effortless wireless collaboration

With Mersive Smart, wireless screen sharing just got a **smart upgrade**.

Part of the Mersive Collaboration Suite, Mersive Smart turns your smart TV or streaming device into a wireless collaboration hub. With an intuitive interface and robust features, it enables effortless sharing, enhanced collaboration, and secure connections—perfect for SMEs, private practices, and K-12.

Benefits

User-friendly setup

Simple activation process ensures you can start sharing within minutes.

Cross-platform compatibility

With no software to download, share from any laptop with ease*.

Clean and unobtrusive

Enhance your meeting space with wireless sharing technology that eliminates the need for additional hardware.

**Support for mobile device sharing coming soon.*

Dynamic collaboration

Enable multiple users to share content simultaneously, fostering interactive and efficient meetings.

Industry-leading security

Ensure all your shared content is protected with robust security features.

Intuitive operation

Enjoy a user-friendly experience that requires minimal training and allows for quick adoption.

Before You Begin

To get your Mersive Smart environment up and running, you'll need 3 things:

1. Stable Internet access,
2. An Android-based smart TV or streaming media device that can access a supported app store, such as Google Play, and
3. A Smart plan from Mersive.

Getting Started

Internet Access

Ensure your device has a stable internet connection for the setup process. If you're setting up Mersive Smart on a corporate network, you may need to allowlist certain URLs to allow access to Mersive cloud services. Please consult your IT department for assistance.

Compatible Devices

Not sure if your TV or device is compatible? Check the list of supported devices at the [Google Play Store](#).

NOTE: Sometimes a device update is needed to find and install the Mersive Smart app. If you're not sure how to update the system software on your TV, check your owner's manual or contact the manufacture.

What if I Don't Have a Compatible Device?

No problem. On professional displays or TVs that don't have access to an app store, you can easily add this functionality with Mersive's Essentials or Pro product offering which includes hardware to deliver effortless wireless screen sharing on any display.

Step 1: Check connectivity.

Make sure your TV or streaming device is connected to the Internet.

Smart Plans

Smart plans are available from Mersive [<link here>](#). There are several options available so you can choose the plan that's right for your organization. If you have not already purchased a plan, you will be prompted to during activation.

Installing Mersive Smart

Step 1: Check connectivity.

Make sure your TV or streaming device is connected to the Internet.

Step 2a: Install the app on your smart TV or streaming device.

Open Google Play on a computer or mobile device and search for Mersive Smart. Click **Install**. The app is free.

NOTE: If you don't see the TV or device, make sure you're in the Google Account that the device is linked to.

Step 3: Activate the app.

Open the app on your device. The Smart app will guide you through the necessary steps to complete the setup process. Follow the activation instructions to create a user and device management organization. Then use the available management tools to configure the Mersive Smart app for your smart TV or streaming device.

Step 4: Start sharing.

To begin sharing, simply open a web browser and navigate to **app.mersive.com**.

At Mersive, we are at the forefront of developing versatile collaboration software, consciously designed to meet the dynamic needs of businesses, educational institutions, and healthcare facilities. Our solutions emphasize intuitive operation, secure data handling, and interoperability to enhance teamwork, learning, and patient engagement, fostering a culture of innovation and connectivity in every interaction.
