

Mersive Accessibility Conformance Report

International Edition

(Based on VPAT® Version 2.5)

Name of Product/Version: Mersive Collaboration Suite

Report Date: September 2025

Product Description: The Mersive Collaboration Suite enables collaborative content sharing to shared displays in conference rooms, classrooms, common areas or anywhere users would like to wirelessly connect and share content to a display. The product suite is partitioned into three components; 1) Mersive Smart, Mersive Essentials, and Mersive Pro are the tiered product options that connect directly to the display in the room to receive and display content from various devices, display information to users, and provide other in-room services, 2) the web-based clients for MacOS and Windows and mobile casting on iOS (AirPlay) and Android (Google Cast) to allow any user to share content on-demand to the display, and 3) the Mersive Management Portal for centralized management, monitoring, and analytics.

Evaluation Methods Used:

Mersive evaluates our accessibility in a major audit once a year. In addition, with each release, any feature update or introduction is assessed and the corresponding VPAT sections are updated. Evaluation is performed internally with Mersive's design team, and then reviewed by the corresponding product manager for the relevant products. In practice, these assessments are performed by studying the relevant criteria as outlined in the latest governmental standards, and then reviewed live by analyzing the product performance against those criteria. While we do discuss accessibility requirements and improvements with customers, users, and even study accessibility issues in field trials – internal evaluation is the majority of the data that drives our assessment and reporting.

The Mersive roadmap is typically updated as part of this process. When deficiencies are identified that will be addressed they are called out in the VPAT document, and the Mersive product suite roadmaps are updated to reflect the new plan.
