

Let VMAP Buy You Lunch!

We bring lunch, you bring your team!

VMAP is a state-funded mental health consultation and education program available **at no cost** to Virginia primary care clinicians caring for pediatric patients.

We will come to your practice (or meet with you virtually!) and share the following with your team:

- How to utilize the VMAP Line to support your pediatric patients
- VMAP's continuing medical education opportunities for prescribers
- **Optional:** VMAP can include additional education for your team on specific mental health issues that you see at your practice!
