

# Sharing Your Device to the Solstice Display

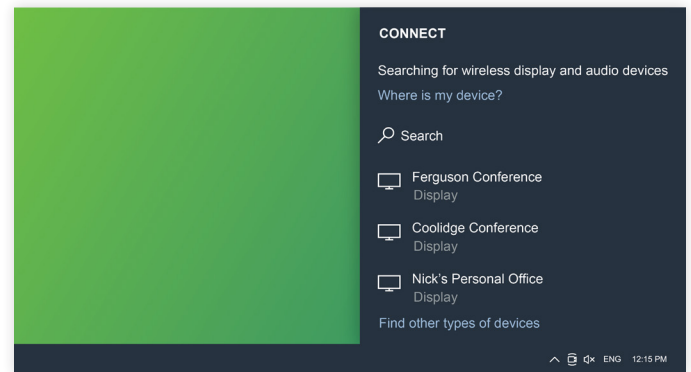

## Share content with a web browser from your laptop

1. Connect to the WiFi network shown on the Solstice display.
2. Go to <https://share.mersive.com> in a web browser (Google Chrome is recommended).
3. Enter the address on the display and Connect.
4. If asked, enter the 4-digit key on the Solstice display.
5. Click Share and select your whole screen, a window, or a browser tab.

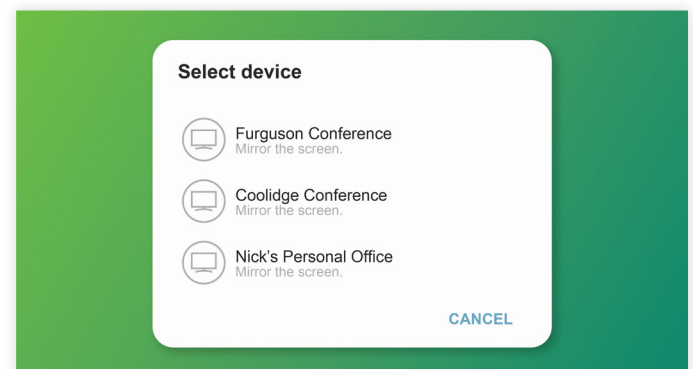

## Mirror your Windows screen with Miracast

1. If possible, connect to the WiFi network shown on the Solstice display.
2. Press Windows+K to open the Connect panel.
3. Choose the name of the Solstice display.
4. If asked, enter the 4-digit key on the Solstice display.

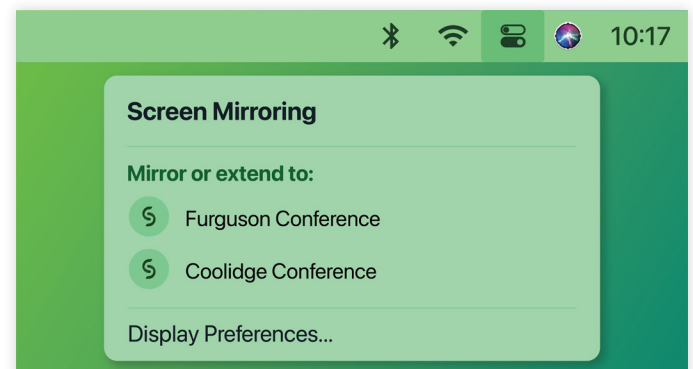

## Mirror your Android screen with Miracast\*

1. If possible, connect to the WiFi network shown on the Solstice display.
2. From the top of your Android screen, swipe down twice to open the Quick Settings menu.
3. Select Wireless Projection or Smart View.
4. Choose the name of the Solstice display.
5. If asked, enter the 4-digit key on the Solstice display.

## Mirror your iOS or macOS screen with AirPlay

1. Connect to the WiFi network shown on the Solstice display.
2. Select AirPlay Screen Mirroring.
3. Choose the name of the Solstice display.
4. If asked, enter the 4-digit key on the Solstice display.

\*Not all Android devices support Miracast. To share with any device via the Mersive App, visit [mersive.com/download/](https://mersive.com/download/).
